

Technical Service Training

Procedures. Products. People.

Genesis Technical Service Training is designed for customer and dealer service supervisors and technicians to become familiar with the maintenance, repair and troubleshooting procedures recommended for their Genesis attachments. By completion, attendees will have the basic service and maintenance skills required for optimal attachment performance, resulting in increased uptime and productivity, reduced operating costs and longer attachment life.

Agenda

1. Welcome

2. Procedures:

Installation	Welding	Settings
Operation	Hydraulics and Rotation	Rotation Valve Options
Maintenance	Hydraulic System	Hydraulic Swivels
Warranty	Regeneration Valve	

4. Rebuild Services

5. Parts and Service

6. Products:

Shears
Concrete Processors
Grapples

3. Factory Tour - Steel toe boots/shoes are required.
